Did you find any unique characteristics in the deep faked videos that you would like to mention?

55 responses

No

None

-

Unnatural facial expressions, Awkward-looking body or posture

Video is distorted and the face of the person flickers alot.

There were some weird movements near the face in the video, looked like there were some changes made in the video for the face.

Not so experienced

Closeness to real human being

I could easilv detect that it is a fake video since the speaking speed and hand gesture

According to you, what impact does Deep Fake videos have on socieity?

55 responses

Deepfake is a real threat society influencing the sentiments and perceptions of people around us. Popular celebrities, politicians and other personalities is getting badly affected by the misuse of AI-backed such technologies

Damage reputations, if video represents a biased sect of the society, deepfake videos can also learn those biases and can represent them.

Dangerous to the society

Depends on how it is being used. It's good if it's used for good say as virtual assistants.

Bad

I feel there are many negative impacts. Imagine a viral video of a politician going around with wrong message which he/she hasn't intended to say

It has the ability to influence opinion in mass with the onset of social media.
